Wheat that will be used for bread making requires more nitrogen than wheat that will be used for feed. Those who wish to cultivate bread wheat can therefore use a higher nitrogen standard quota, if the requirements for cultivation of bread wheat are met. The rules governing cultivation of bread wheat can be found in Section 4 in the executive order "gødskningsbekendtgørelsen".</p> <p>The purpose of "bekendtgørelse om brødhvede" is to ensure that the higher nitrogen standard quota is given to bread wheat with a high cultivation stability and thus ensure that the bread wheat will be used for bread making.</p> <p>The draft contains a revision of the criteria for adding cultivars of bread wheat on the bread wheat list, which can currently be found as appendix 1, table 3 to "gødskningsbekendtgørelsen". Criteria are listed in Article 4 of the Regulation (and also detailed in Annex II thereto) which must be met to enable approval.</p> <p>During the evaluation and peer-review of bifenazate, a number of concerns and areas that could not be finalised were identified. These are detailed in the conclusion of the European Food Safety Authority (EFSA).</p> <p>This means that bifenazate meets the approval criteria as outlined in Regulation (EC) No 1107/2009 only if its use is restricted to non-edible crops in permanent greenhouses. The restriction to use on non-edible crops will exclude dietary exposure of consumers and is required since the consumer risk assessment could not be finalised. As a high risk was identified to birds via long term exposure to bifenazate, a restriction to use in greenhouses as defined in Article 3 of Regulation (EC) No 1107/2009 will ensure that birds are not exposed to bifenazate.</p> <p>Existing authorisations will need to be amended or withdrawn</p>	<p>25 March 2022</p>
