Draft Sri Lanka Standard HEALTH INFORMATICS – CATEGORIAL STRUCTURE FOR REPRESENTATION OF 3D HUMAN BODY POSITION SYSTEM PART 2: BODY MOVEMENT

NATIONAL FOREWORD

This Sri Lanka Standard was approved by the Sectoral Committee on Food Products and was authorized for adoption and publication as a Sri Lanka Standard by the Council of the Sri Lanka Standards Institution on

This Sri Lanka Standard is identical with published **ISO/ TS 23541-2: 2025** health informatics – Categorial structure for representation of 3D human body position system – Part 2: Body movements, by the International Organization for Standardization (ISO).

This Standard provides terminological concepts for the representation of human body movement and establishes the categories and relationships of text-based terminology and time-dependent body movement in 3D data. The document does not cover 3D graphic user interface, data structure, implementation and guidelines.

Terminology and conventions:

The text of the International Standard has been accepted as suitable for publication, without deviation, as a Sri Lanka Standard. However, certain terminology and conventions are not identical with those used in Sri Lanka Standards. Attention is therefore drawn to the following:

- a) Wherever the words "International Standard" appear referring to this Standard, it should be interpreted as "Sri Lanka Standard".
- b) The comma has been used throughout as a decimal marker. In Sri Lanka Standards it is the current practice to use the full point on the base line as the decimal marker.
- c) Wherever page numbers are quoted, they are ISO page numbers.
